DETAILED ACTION

1. According to the "Preliminary Amendment" received December 19, 2001, the specification has been amended; claims 4, 5, 7 and 8 have been amended; and claims 14 and 15 have been added.

Allowable Subject Matter

2. Claims 1-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art fails to disclose or make obvious an ion mobility spectrometer system comprising: an ion mobility detector; a gas/vapor circulating system the circulating system comprising an ion mobility cell, means for drying and/or cleaning the circulating gases/vapors in the circulating system, a dopant source, and means for causing circulation of the gases/vapors within the circulating system; in which the dopant source and the means for drying and/or cleaning the circulating gases/vapors are combined.

The main feature that separates the mobility spectrometer system apart from prior art is combining the dopant source and the means for drying and/or cleaning the circulating gases/vapors, thus obviating the need for a physically separate dopant source.

Claims 2-15 are allowed by virtue of their dependency on claims 1.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"

Relevant Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Regiec et al. (USPN 5554846) and Stroosnyder (USPN 587581) both disclose an IMS system for detecting alarm molecules in an air sample that comprises an IMS with a gas/vapor circulating system and a sieve pack that serves as a mixing chamber for a dopant supplied by a dopant permeation tube.
